

CCA SUMMER MATH 2019-2020

This has been a great year of learning at CCA. In order to retain the progress that has been made and combat “summer slide,” students are required to complete Summer Math assignments before returning to school in the fall.

For RETURNING STUDENTS:

Each grade level has different assignments that have been posted to Google Classroom. Students will be using IXL, and must log into IXL with their CCA account. All IXL accounts will be reset to begin fresh on Friday, May 31st. Summer assignments will be due the first day of school. Students must check their CCA email this summer for invitations to join the correct classroom.

For NEW STUDENTS:

Students new to CCA will complete Summer Reading assignments, but will not have an IXL account. These students should practice Math at least 20 minutes a day. Here are some recommended websites they may use for that practice. They should keep a log of the dates/times they have practiced Math in order to insure they receive proper credit for their work:

Mrs. Behr-Jerome will be on the CCA campus, tutoring all levels of Mathematics each Wednesday, from 11am to 2pm, beginning June 3rd. There will be no tutoring the week of July 4. Tutoring will take place in Room 260, and students may borrow a Chromebook during tutoring hours. MATH TUTORING IS AVAILABLE FOR BOTH NEW AND RETURNING STUDENTS.
